

Job description: Head of Content, MDCalc

MDCalc is hiring a new Head of Content! To apply, please send cover letter and résumé to rachel@mdcalc.com.

In case you haven't heard of us...

MDCalc is the **leading digital resource** for clinical decision tools used by 1 million+ healthcare professionals monthly. Founded in 2005 by Dr. Graham Walker, MDCalc is continually expanding access to free, easy-to-use, evidence-based content to help deliver higher quality, more efficient care to patients. We provide resources for 35+ specialties and 200+ diseases through our website, iPhone app, and other applications, and we have a growing presence globally, with users in over 100 countries.

Come join us as we drive the **most widely used medical reference by physicians** at the point of care. Despite our broad global impact, we are a small team still run by the practicing physicians who founded us, without outside investors or influence, and every member of our unique team is passionate about our mission to help the millions of doctors who use us to better care for tens of millions of patients worldwide.

Main responsibilities include...

- Overseeing all content development and leading MDCalc's editorial process with our internal content team and broad network of expert (physician) contributors
- Collaborating with MDCalc's Head of Technology to translate clinical reasoning into computer-friendly formats for our electronic health record (EHR) integration, MDCalc on FHIR
- Liaise with hospitals and hospital systems (admins and informatics/tech teams) on clinical applications and assessments of EHR integration
- Coordinating and strategically growing our Scientific Advisory and Editorial Boards
- Playing a key role as a member of MDCalc's leadership team in executing high-level company goals
- Providing a clinical and content-focused perspective on sales, marketing, and other usage growth areas

Basic requirements...

- Master's or doctorate-level degree in a scientific or medical field (e.g. MPH, MS/MSc, MD, DO, PhD)
- Experience working in a clinical medical setting and proficiency with the EHR
- Strong understanding of and passion for evidence-based medicine (EBM) and clinical decision support
- Project management experience coordinating work with multiple moving parts and collaborators (both in-person and remotely)
- Minimum of 20 hours per week up to full-time (preferred)

To stand out, you...

- Have a strong ability to effectively communicate (both verbally and in writing) and cultivate relationships with healthcare providers and other stakeholders
- Are able to work independently, collaborate with distributed teams, and meet deadlines
- Have demonstrated talent for original writing and editing of medically technical content
- Understand complex scientific data and can translate them into concise, digestible, and relevant content for clinicians
- Are hyper-organized and can create/manage systems for tracking and filing
